

VICTOR

Wall-mounted Control Station

Wall-mounted auxiliary control station, featuring an innovative design, cutting-edge technology and an ergonomic enclosure that is smooth, practical and wear resistant.

Designed to reduce maintenance down time to a minimum, Victor is also available with magnetic mounting case and it can be configured according to customers' needs.

FEATURES

- Reduced installation and wiring time and costs: the cable inlet and the switches fitted in the base of the control station are separated from the actuators, installed on the cover.
- Rubber pushbuttons with symbol disks to ensure protection against dust and prevent jamming when the control station is used in harsh environments.
- The emergency stop mushroom pushbutton complies with standard ISO 13850.
- Positive opening NC contacts for safety functions.
- Mechanical life of pushbuttons and switches: 10 million operations.
- IP protection degree: Victor 1-2-3-4 actuators is classified IP66, IP67 and IP69K, Victor 6-8 actuators IP65.
- NEMA protection degree: grey and black Victor is classified Type 1, 4 and 4X*; yellow Victor is classified Type 1, 4 and 4X* for indoor use only.
- Extreme temperature resistance: -40°F to +176°F (-40°C to +80°C).
- All materials and components used are wear resistant and guarantee protection of the unit against water and dust.

OPTIONS

- Available in configuration from 1 to 8 actuators.
- Cable clamp can be installed at the top, at the bottom or on the back of the control station.
- Available with magnetic mounting case to make the control station even more versatile.
- 1NO or 1NC switches, LEDs voltage 24/48 Vac/dc or 110/230 Vac and potentiometers.
- Mechanical interlock to prevent simultaneous operation of opposite functions.

- Wide range of actuators in different colours: one or two speed pushbuttons, selector switches and key-selector switches in various operation configurations, pilot lights, impulse or latched mushroom pushbuttons with rotation or key-operated release.
- One speed pushbuttons and selector switches available in illuminated version in a range of colours.
- Latched on-off maintained pushbutton enabling an effective visive perception of the command activation.
- Available with labels (symbols and lettering) to be applied next to the actuators, or with pushbuttons with two-colour moulded permanent symbols.

CERTIFICATIONS

- CE marking, cULus* marking and EAC certification.
- Victor is available, upon request, with the SIL1 certification (Safety Integrity Level 1), according to Standard IEC61508.
- Complies with accident prevention regulation BGV C 1 (only for Germany)
- HALT TEST (Highly Accelerated Life Test) passed, simulating conditions largely exceeding standard operating conditions.

* Not available on all versions.

The data and the products illustrated in this brochure may be modified without notice. Under no circumstances can their description have a contractual value.

VICTOR - REQUEST FORM FOR NON STANDARD PENDANT STATION

Instructions

(See next page for list of components and legends)

Fill in the chart to the left according to the number of control elements required. Control stations are available with 1-2-3-4-6-8 control elements.

- 1 Control elements:** enter the number corresponding to the control element required (1 to 39) according to the legend. Eg. 25

ATTENTION: the rectangular mushroom pushbutton (8 - 9) is available only for Victor with 1 actuator.

- 2 Button disks:** for pushbuttons (1 to 3) enter the number corresponding to the disk required (50 to 85) according to the legend. Both full color disks and transparent disks (for illuminated buttons) are available. Eg. 57

- 3 Color of selectors, mushrooms, pilot lights:** for toggle selector switches (15 to 24), impulse mushroom pushbuttons (7) and pilot lights (11) enter the code corresponding to the color required according to the legend. Eg. RP

- 4** If you choose disks with arrows (legend 54 to 72), enter the direction of the arrow in the circle. Eg. ↗

- 5 Switches, LEDs and potentiometers:** enter the number corresponding to the switch, LED or potentiometers required (90 to 96) according to the legend. It is possible to enter up to 3 switches per position. Es. 91

2 speed pushbuttons can activate two switches on the first speed and one switch on the second speed.

Selector switches can activate only two switches and possibly a LED.

ATTENTION: LEDs can be placed only in the central position and they are used for illuminated buttons and selector switches.

(See Control Element legend for switch activation)

- 6 Mechanical interlock and ON-OFF actuator:** tick the boxes where the mechanical interlock (MI) between two control elements or the latched ON-OFF change-over actuator (LA) is required. Eg. ☒ MI

- 7 Cover:** tick the box corresponding to the cover color required (the base of the enclosure is always black).

ATTENTION: the yellow cover is available only for Victor with 1-2-3 actuators.

- 8 SIL 1 certified:** tick the box if you require SIL 1 certified units.

- 9 Label sheet:** stickers with letterings or symbols may be placed on the left and on the right of any control element. If label sheets are required, tick the corresponding box.

- 10 Magnetic version:** tick the box if you require magnetic mounting case.

- 11 cULus certified:** tick the box if you require cULus certified units. Not available on Victor with 6 and 8 control elements.

Cable clamp: the control stations are supplied with one cable clamp M20 x 1.5 and washer for assembling. The cable clamp can be mounted in various positions.

1 Control elements	2 Button disks	3 Color of selectors, mushrooms, pilot lights	4	5 Switches and LEDs	Potentiometers	VICTOR 1	VICTOR 2	VICTOR 3	VICTOR 4	VICTOR 6	VICTOR 8

1 Legend - Control elements

* SWITCH ACTIVATION

It is possible to mount up to 3 switches for each control element. The chart on the right of each pushbutton or selector switch specifies which position activates the switch on the top, in the middle or on the bottom. If the selector switches are mounted with the lever facing downwards, then the activation of the switches is reversed. Eg.: 2 speed pushbutton: the first speed activates the switches on the top and in the middle, while the second speed activates the switch on the bottom.

Pushbuttons

It is possible to mount up to three switches for each button. LEDs can be mounted only in the middle.

		SWITCH ACTIVATION*
1	1 speed pushbutton with disk	☐ speed 1
25	1 speed black pushbutton	☐ speed 1
26	1 speed grey pushbutton	☐ speed 1
2	2 speed pushbutton with disk	☐ speed 1 ☐ speed 2
27	2 speed black pushbutton	☐ speed 1 ☐ speed 2
28	2 speed grey pushbutton	☐ speed 1 ☐ speed 2
3	1 speed illuminated pushbutton with disk	☐ speed 1 ☐ LED ☐ speed 1

Mushroom pushbuttons

All mushroom pushbuttons activate all the switches at the same time.

- 4 Latched mushroom pushbutton for emergency stop
- 5 Latched mushroom pushbutton for emergency stop Ø 40 mm
- 6 Key mushroom pushbutton
- 7 Impulse mushroom pushbutton Ø 33 mm with black base
- 8 Rectangular red mushroom pushbutton
- 9 Rectangular black mushroom pushbutton

11 Pilot light

12 Blanking plug

Toggle selector switches

It is possible to mount only two switches for each selector. In the middle it is possible to mount only the LED for illuminated selector switches.

		SWITCH ACTIVATION*
15	0/1 spring return	☐ pos 1 ☐ pos 1
16	0/1 maintained positions	☐ pos 1 ☐ pos 1
17	1/0/2 spring return	☐ pos 1 ☐ pos 2

USE AND MAINTENANCE INSTRUCTIONS

Victor Wall-mounted Control Station is an electromechanical device for low voltage control circuits (EN 60947-1, EN 60947-5-1) to be used as electrical equipment on machines (EN 60204-1) in compliance with the fundamental requirements of the Low Voltage Directive 2014/35/UE and of the Machine Directive 2006/42/CE.

The control station is designed for industrial use and also for use under particularly severe climatic conditions (operational temperature from -40°C to $+80^{\circ}\text{C}$, suitable for use in tropical environment). The equipment is not suitable for use in environments with potentially explosive atmosphere, corrosive agents or a high percentage of sodium chloride (saline fog). Oils, acids or solvents may damage the equipment; avoid using them for cleaning.

Do not connect more than one phase to each switch. Do not oil or grease the control elements or the switches.

The installation of the control station shall be carried out by expert and trained personnel. Wiring shall be properly done according to the current instructions.

Prior to the installation and the maintenance of the control station, the main power of the machinery shall be turned off.

Steps for the proper installation of the control station

- Open the control station.
- Break the seat choosen for the cable clamp on the base (7) making sure to remove any burr; in Victor 1 remove the switch support first (9).
- If you choose the bottom seats in Victor 1, fit the washer (10) (Victor 2-3-4-6-8 do not require washers in the bottom seats). For all control station Victor 1-2-3-4-6-8, if you choose the side seats fit the washer (5) and tighten the cable clamp (6).
- Fasten the control station on the desired support, making sure to match the spacing of the fixing holes on the base (7). Use M4 screws and check that the equipment is properly fastened. Use only the special fixing holes to fasten the control station.
- Insert the multi-pole cable into the control station through the cable clamp (6). Strip the cable to a length suitable for wiring the switches/LED (8).
- Tape the stripped part of the cable.
- Tighten the cable clamp (6) to fasten the multi-pole cable.
- Connect all the switches/LED (8) according to the wiring layout printed on the switches/LED and overleaf (tighten the wires into the terminals with a torque equal to 0.5 Nm; (UL (c)UL: use 60°C or 75°C copper (CU) conductors and stiff or flexible wire 14-22 AWG); insertability of wires into the terminals: $2 \times 0.5 \text{ mm}^2$ - $2 \times 1.5 \text{ mm}^2$ - $1 \times 2.5 \text{ mm}^2$).
- Close the control station checking the proper positioning of the tightening gasket (4), making sure the gasket fits well into the cover and the base seats.

ATTENTION: make sure that cover and base are positioned in the proper direction. Make sure no cable is in between the switches/LED (8) and the actuators mounted on the upper cover (1). Tighten the fixing screws (3) on the cover (1) with a torque of 250 cNm.

ATTENTION: Do not operate on the pushbuttons when the control station is not perfectly closed (with screws tightened and clips fitted) as this may cause the release of the mechanical interlock. If this happens, re-position the mechanical interlock before closing the control station.

Periodic maintenance steps

- Check the proper tightening of the screws (3) of the enclosure (1, 7).
- Check the proper tightening of the switch/LED (8) terminal screws.
- Check the wiring conditions (in particular where wires clamp into the switches).
- Check the conditions of the tightening gasket (4), of the rubber of the actuators (2) and of the cable clamp (6).
- Check that the plastic enclosure (1, 7) of the control station is not broken.
- Check that the control station is properly fastened.

In case any component of the pendant station is modified, the validity of the markings and the guarantee on the equipment are annulled. Should any component need replacement, use original spare parts only.

TER declines all responsibility for damages caused by the improper use or installation of the equipment.

UL Specifications

UL Technical Specifications

UL certified Victor code = F81XXXXXXXXXXXXX

Category = NKCR / NKCR7

Switch Rating = A600, Q600

LED PRSL1821PI Rating = 110 – 240Vac, 1.15 – 2.50 mA

LED PRSL1820PI Rating = 24 – 48 Vdc/ac, 1.30 – 2.70 mA

Environmental Rating (Victor grey and black) = Type 1, 4 and 4X

Environmental Rating (Victor yellow) = Type 1, 4 and 4X indoor use only

Cord diameter range = 10-14 mm (PRPS0100PE)

= 6-12 mm (PRPS0105PE)

= 10-14 mm (PRPS0090PE)

= 6-12 mm (PRPS0095PE)

Cord type = flexible, type minimum SW or SJW (ZJCZ/7)

Wire size range = 14-22 AWG stranded or solid

Conductors = Copper (CU) 60/75°C

Terminal tightening torque = 4.50 lb.in (0.5Nm)

Marking = 

Emergency Stop Button

Category = NISD3

Code = PRSL1880PI, PRSL1881PI

Switch = PRSL1801PI (A600, Q600)

Optional Switch = PRSL1800PI (A600, Q600)

Code = PRSL1890PI

Switch = PRSL1801PI (A600, Q600)

These unlisted components "emergency stop buttons" are intended for use within TECNO ELETTRICA RAVASI S.R.L. Listed (NKCR) Mike and Victor pushbutton stations.

Switch activation

No. of actuators	Dimensions
	A
1	1.5" (37.9 mm)
2	3.4" (87 mm)
3	4.6" (117 mm)
4	5.8" (147 mm)
6	8.1" (207 mm)
8	10.51" (267 mm)

Welcome to the Springer Controls Company. Product Guide to the TER VICTOR Wall-Mounted Control Station. This section reflects our continuing commitment to our customers to provide complete, up-to-date product information and technical data. We appreciate your choosing Springer Controls and we will continue to update this information as well as provide new products to meet today's demands for electrical control products.
